

2013 FLYING BY

2013 started with a bang and now we are already in March. Minesoft launched Estimation 4 and implemented it at all the Gold Fields Mines in South Africa.

Gold Fields has announced the creation of Sibanye Gold Limited: a new company formed through the unbundling of its subsidiary, GFL Mining South Africa.

MINESOFT AT MINING INDABA

Deon van Niekerk (COO) & Rozel Pretorius

We would like to welcome Sibanye Gold, who utilises our Minesoft Estimation software package, to our client base.

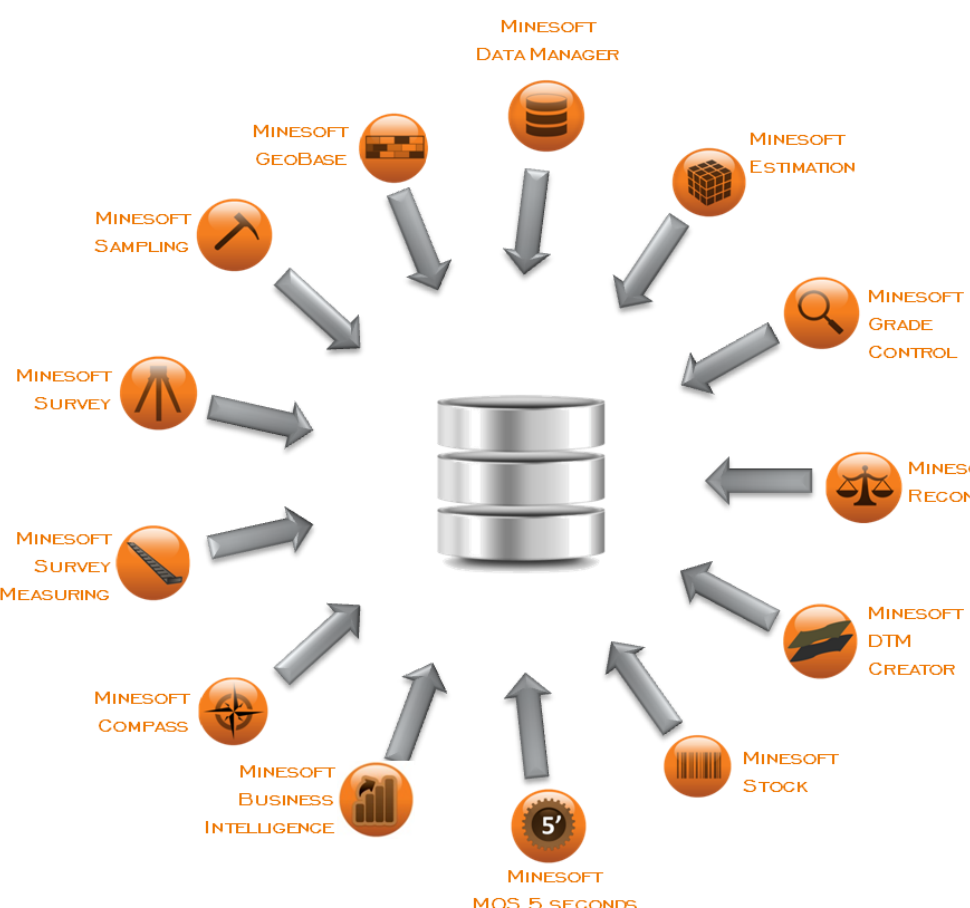

Please contact us to schedule an appointment if you are interested in finding out more about our software packages.

At the beginning of February 2013, all of our Directors went to Cape Town to attend the annual Mining Indaba.

The conference was a successful event, that afforded us the opportunity to network with companies who are interested in our various software packages.
